

IT Resource Centre

Draupadi Trust has been working since 2004 to enhance the Socio-economic status of underprivileged people. Besides exposing them the new technology of information, the Trust also per sued with the Government for Technology. Integration for enhancing their skills & income generation opportunities for them.

IT education is key to any progress today and equally crucial for India's progress as an emerging Global Resource Center and Power. In every field i.e. education sector – school, colleges, universities, etc.; services – bank, agriculture, management, transport, enquiry, etc. and many more other sectors too. IT is becoming essential so the rural areas should have the knowledge of advanced technology. IT is now a very important part of our economy. In rural areas people have little or no access to this knowledge. Thus IT oriented skills are building the confidence of the people so that they can work in any form of the sectors. Through this it helps them in generating the income and fulfilling the needs of their loved ones. This is one of the forms which help our country to be called as a Developed Country as other countries are.
